**DETAILED ACTION**

***Response to Amendment***

1. This Detailed Action is in response to the amendment filed on 1/21/04. Claims 1-4 and 6 have been cancelled. Claims 5 and 7-11 are pending in the application. Claims 7-11 are newly added claims.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 7-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 7, line 8 recites "qn is in the range of  $0.02 \leq qn \leq 0.03$ ". The specification does not describe "0.03".

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7, 8 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zhang et al. "Study of Resistance Against Photorefractive Light-Induced Scattering in  $\text{LiNbO}_3$ : Fe, Mg Crystals".

Zhang et al. discloses a  $\text{LiNbO}_3$ : Fe, Mg crystal, which may be utilized in optical processing, dynamic holography techniques (an optical storage material). Zhang et al. continues to disclose wherein M is Mg, Zn, or In. Zhang et al. continues to disclose wherein the Mg concentration is 4.6 mol%. Since, Zhang et al. teaches  $\text{LiNbO}_3$ , it would have been obvious to one of ordinary skill in the art to meet the stoichiometric values of the congruent composition, because Zhang et al. clearly teaches wherein a  $\text{LiNbO}_3$ : Fe composition is doped with magnesium, indium or zinc as a three-dimensional optical storage material, and wherein the Mg concentration is 4.6 mol%.

#### ***Allowable Subject Matter***

6. Claims 9 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The cited prior art fails to disclose the mole percentage and the congruent composition of the doubly doped lithium niobate crystal having the mole percentage of In and Zn.

#### ***Response to Arguments***

7. Applicant's arguments with respect to claims 7-11 have been considered but are moot in view of the new ground(s) of rejection.

Examiner has considered Applicant's arguments with respect to Zhang. However, Zhang clearly discloses the compositional formula of the lithium niobate crystal. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the high diffraction efficiencies, the fast response speeds of photorefraction, and the high resistance to optical scattering) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

### **Conclusion**

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
